

HYNTRA OPERATIONAL ARCHITECTURE

General Architecture Specification

HOA-000

Release: Beta 0.1

Reference Document

HYNTRA White Paper

Release r01-2026.05.28

1. Purpose

The HYNTRA Operational Architecture (HOA) series constitutes the technical reference documentation for the design, development and subsequent implementation of the HYNTRA token.

The White Paper is the constitutional document of the project and defines its:

- principles;
- economic architecture;
- Tokenomics;
- governance;
- operational model.

The HOA documents do not modify these principles.

They constitute exclusively their technical translation.

2. Relationship with the White Paper

Every requirement set out in the HOA series derives exclusively from the White Paper.

Each section provides a reference to the source chapter or paragraph.

The HOA does not introduce new economic rules.

Should the technical design reveal logical or functional inconsistencies, they will be addressed through a new Release of the White Paper.

In all cases, the White Paper remains the prevailing document.

3. Principle of Correspondence

Each element described in the HOA series has a unique correspondence in the technical implementation of the HYNTRA White Paper.

4. Reference Documentation

The HOA series assumes familiarity with the following documents.

Document	Function
White Paper	Constitutional Document
Executive Summary	Project Summary
Tokenomics Summary	Economic Summary
Research Notes	Complementary Documentation

This document does not replace these publications.

5. Conventions

The entire architecture uses permanent identifiers.

Item	Convention
Document	HOA-xxx
Wallet	HYX-WMn-xx
Smart Contract Function	SC-xxx
Event	EV-xxx
Component	CMP-xxx
Rule	R-xxx
Actor	ACT-xxx
Positive Functional Test	PT-xxx
Negative Functional Test	NT-xxx

The identifiers remain unchanged in subsequent Releases.

6. Documentation Architecture

Level	Document	Function
L0	White Paper	Constitutional Document
L1	HOA-000	Principles of the Operational Architecture
L2	HOA-001	Exchange Partnership & IEO
L2	HOA-002	Listing & Market Development
L2	HOA-003	Project Fund
L2	HOA-004	Team & Founder
L2	HOA-005	Incentives, Rewards & Donations

7. Sources and Uses Statement

Each HOA Module concludes with a Sources and Uses Statement which, where applicable, highlights functional continuity with the preceding Modules by identifying the resources received and their destination.

Each Sources and Uses Statement must be independently balanced. Total Sources must equal total Uses.

8. Project Status

The HOA series constitutes the technical documentation intended for the progressive implementation of HYNTRA Tokenomics on the blockchain through modular Smart Contracts and selective Deployments of the different operational Modules.
